

British Wool LEARNING

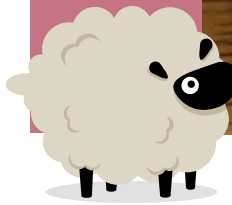

MAKE A WOOL BRACELET

Upcycle a boring old bracelet... with wool! This simple but effective idea will transform a tired old bracelet and give it a whole new look and a brand new lease of life! Best of all, because this bracelet only takes a short time to make you can easily change the look as often as you like!

You will need:

- Wool of any colour (as many colours as you like)
- An old bracelet
- Scissors
- Sticky tape

MAKE A WOOL BRACELET

ONE

Start your bracelet by sticking the wool to it with tape. This secures the wool but allows you to easily remove it if you decide to change the design and re-use the bracelet. The tape won't be seen once it is covered with the yarn.

TWO

Wind the wool yarn closely around the bracelet. Wrap it quite tightly, making sure not to leave gaps between the yarn.

THREE

Continue to wind the wool around and around the bracelet. If you decide to change colour, simply secure the new yarn with tape (or tie) and continue in the same way.

FOUR

Once you have covered all of the bracelet with wool, tuck the last loose strand behind the wrapped wool to secure and finish.
